Assignment-2077

(Shrawan 25, 2077, Sunday)

Class: Five

Subject- Life Skills

Five W's and H
Five W's and H is a system of asking questions. You ask questions starting with these words:

- What...
- Who...
- Where...
- When...
- Why...
- How...

This system of asking questions is used by all great thinkers. Even scientists use this same system.

A. Look at the picture below and write questions about it using the Five W's and H.

विषय - नेपाली

ब्याकरण किताबको पेज नं २०, २१ र २२ किताबमा गर ।

Subject- Social Studies

1. List any 4 service providing offices.
2. What service do you get from the post office?
3. List any 4 harmful effects of alcohol abuse.

4. Subject- Mathematics

1. a) When some sweets are divided between 9 children, each gets 7 sweets and 2 sweets are left to divide. How many sweets are there altogether ?
- b) In a school assembly, students are arranged in 15 rows with 18 students in each row. If 7 students are left to arrange in this way, how many students are there in the assembly ?

It's your time - Project work !

2. a) Estimate how many kilometres (or metres) do you travel everyday while coming to school and going to your home ? Calculate the distance travelled by you in a week (except weekend).
- b) Estimate how many grams (or kilograms) of rice do your family consume in 1 day ? Discuss with your family members and estimate the quantity of rice consumed in (i) 1 week (ii) 1 month (iii) 1 year.
- c) A 8 - 10 year old child needs to drink roughly 1500 ml of water each day. Now, estimate how many millilitres of water do you drink in (i) 1 day (ii) 1 week (iii) 1 month (iv) 1 year ?

The End.
